

# CamCom AI

AI that sees. Intelligence that acts. **Impact that scales.**

Website  
**Camcom.ai**

LinkedIn  
**@CamCom AI**

# Eight years turning visual inspection into infrastructure.

**Founded 2017**

**India · UAE · Germany · USA**

**6 Fortune 500 customers**

**25+ countries · 6 continents**

**120M+ inspections completed**

**500M+ images processed monthly**

Built in India, **for the world.**

# Visual inspection still runs on **human eyes**.

**. Slow, subjective, impossible to scale.**

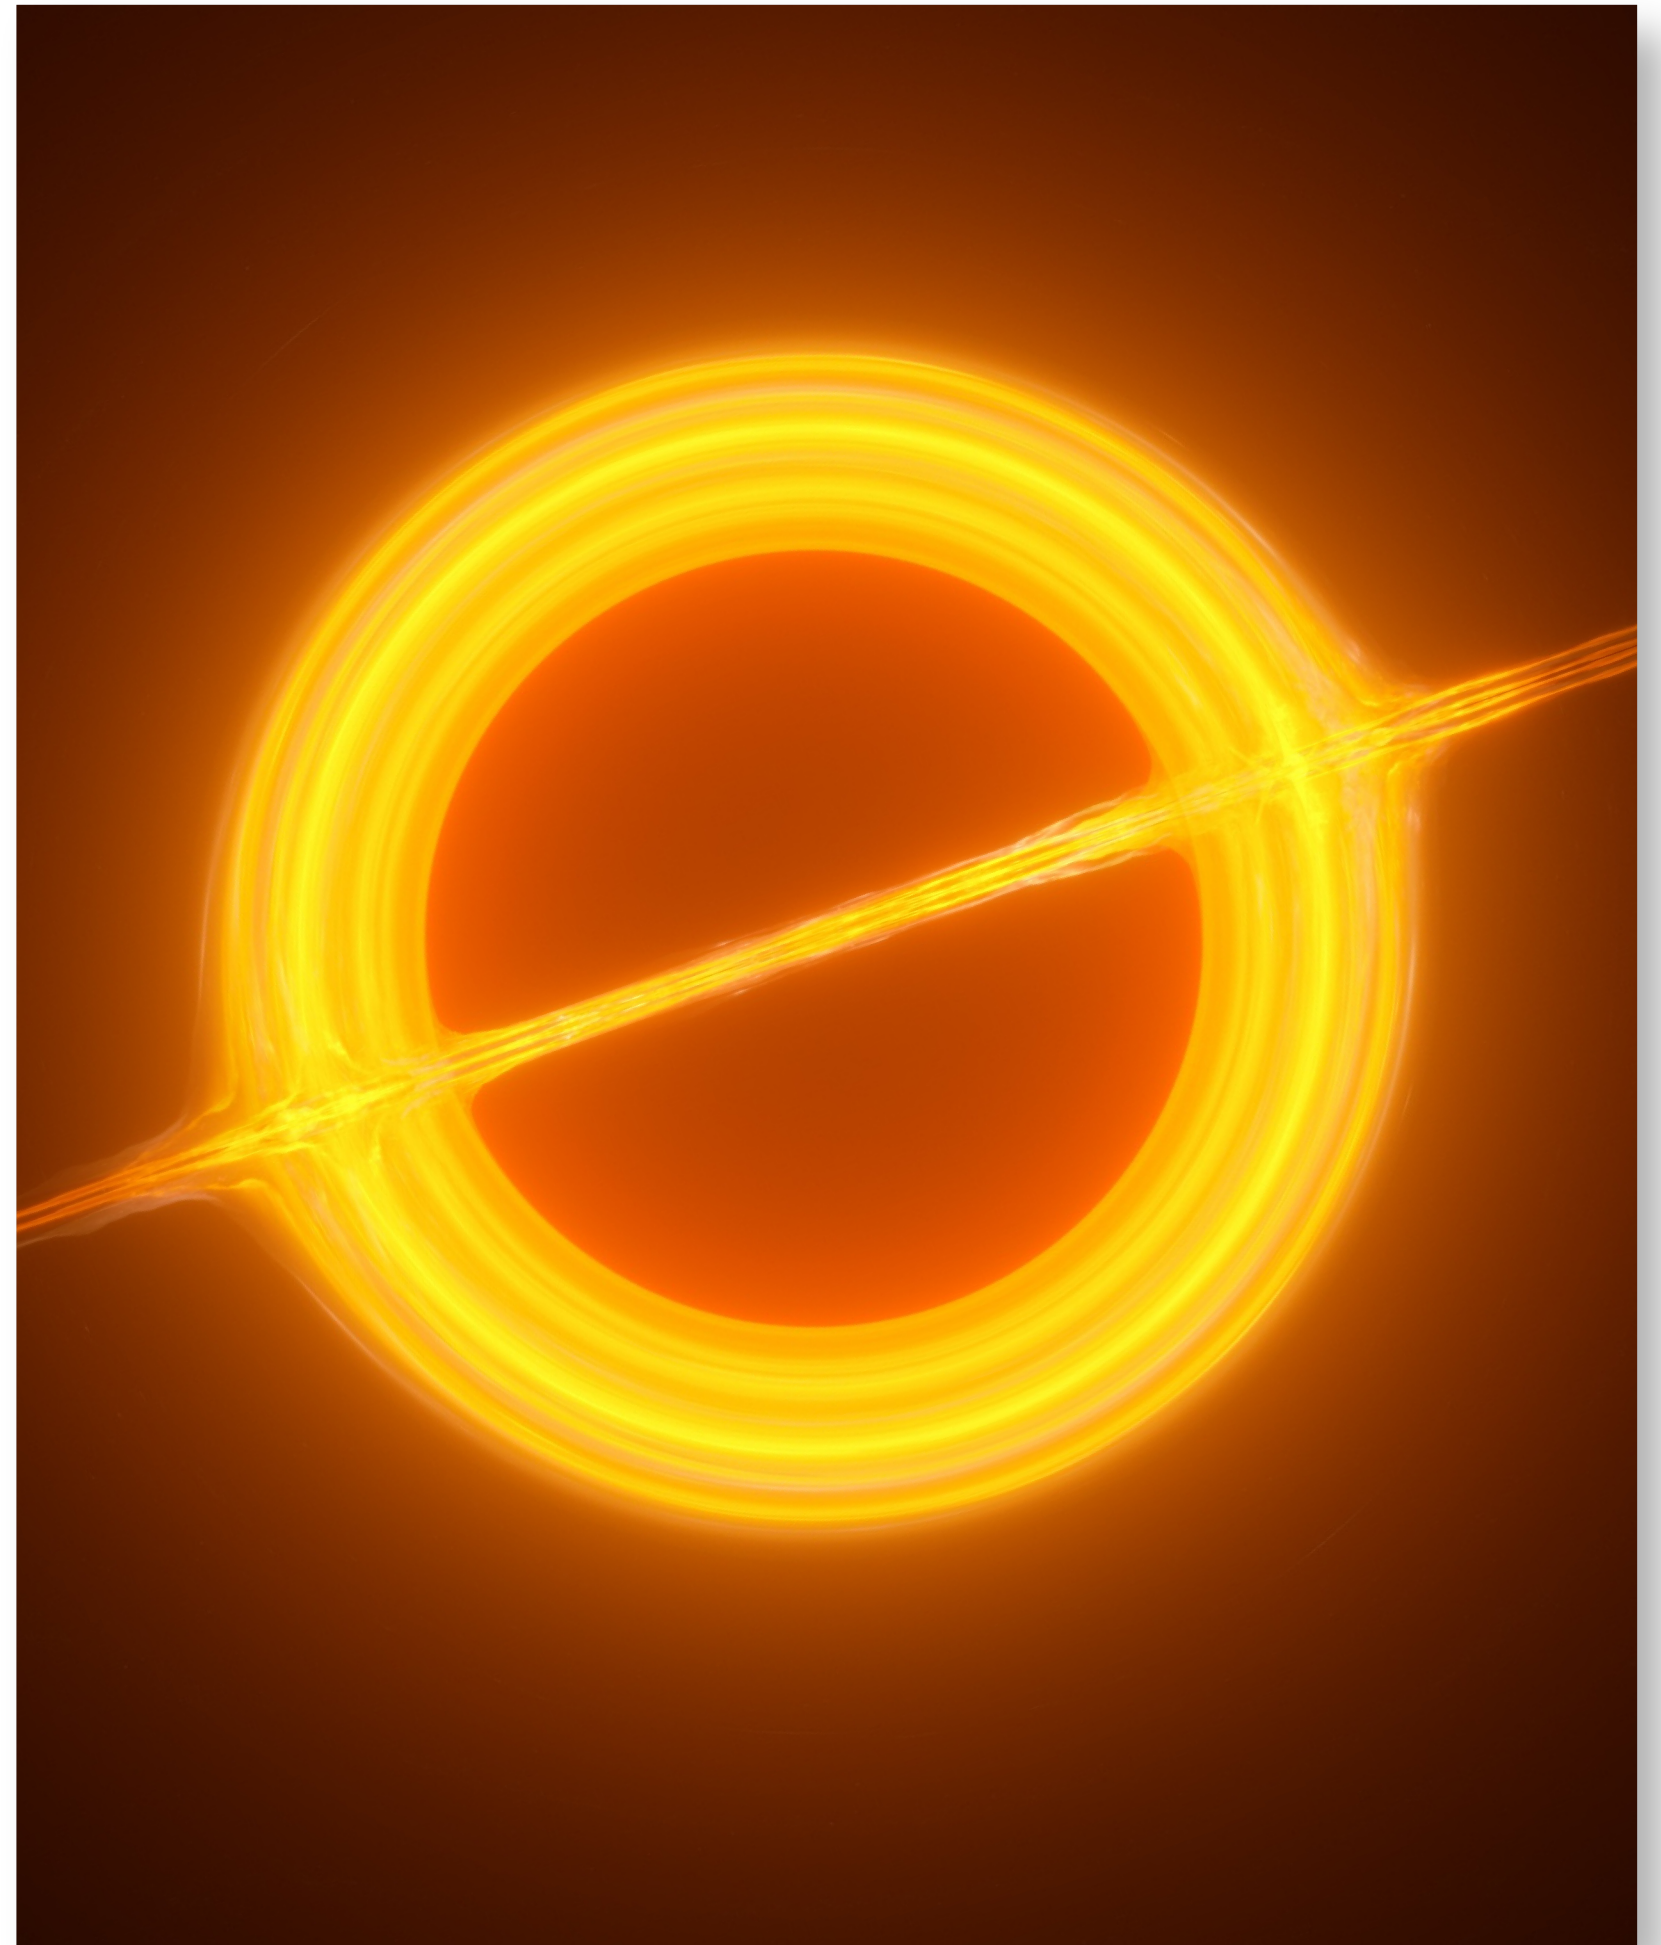

The bottleneck isn't effort. **It's the eye.**

# Moving AI vision from pixels to physics.

CamCom builds AI visual inspection that detects, assesses, and acts on what it sees — across any surface, product, or infrastructure. Not pattern-matching on images.

Physics over pixels.

# Structured intelligence, built for the real world.

# One AI model, Four industries that can't afford to go wrong.

EYE THE FUTURE

## Public Safety

- Public Infrastructure
- Compliance & Regulations
- Critical National Infrastructure

## Insurance

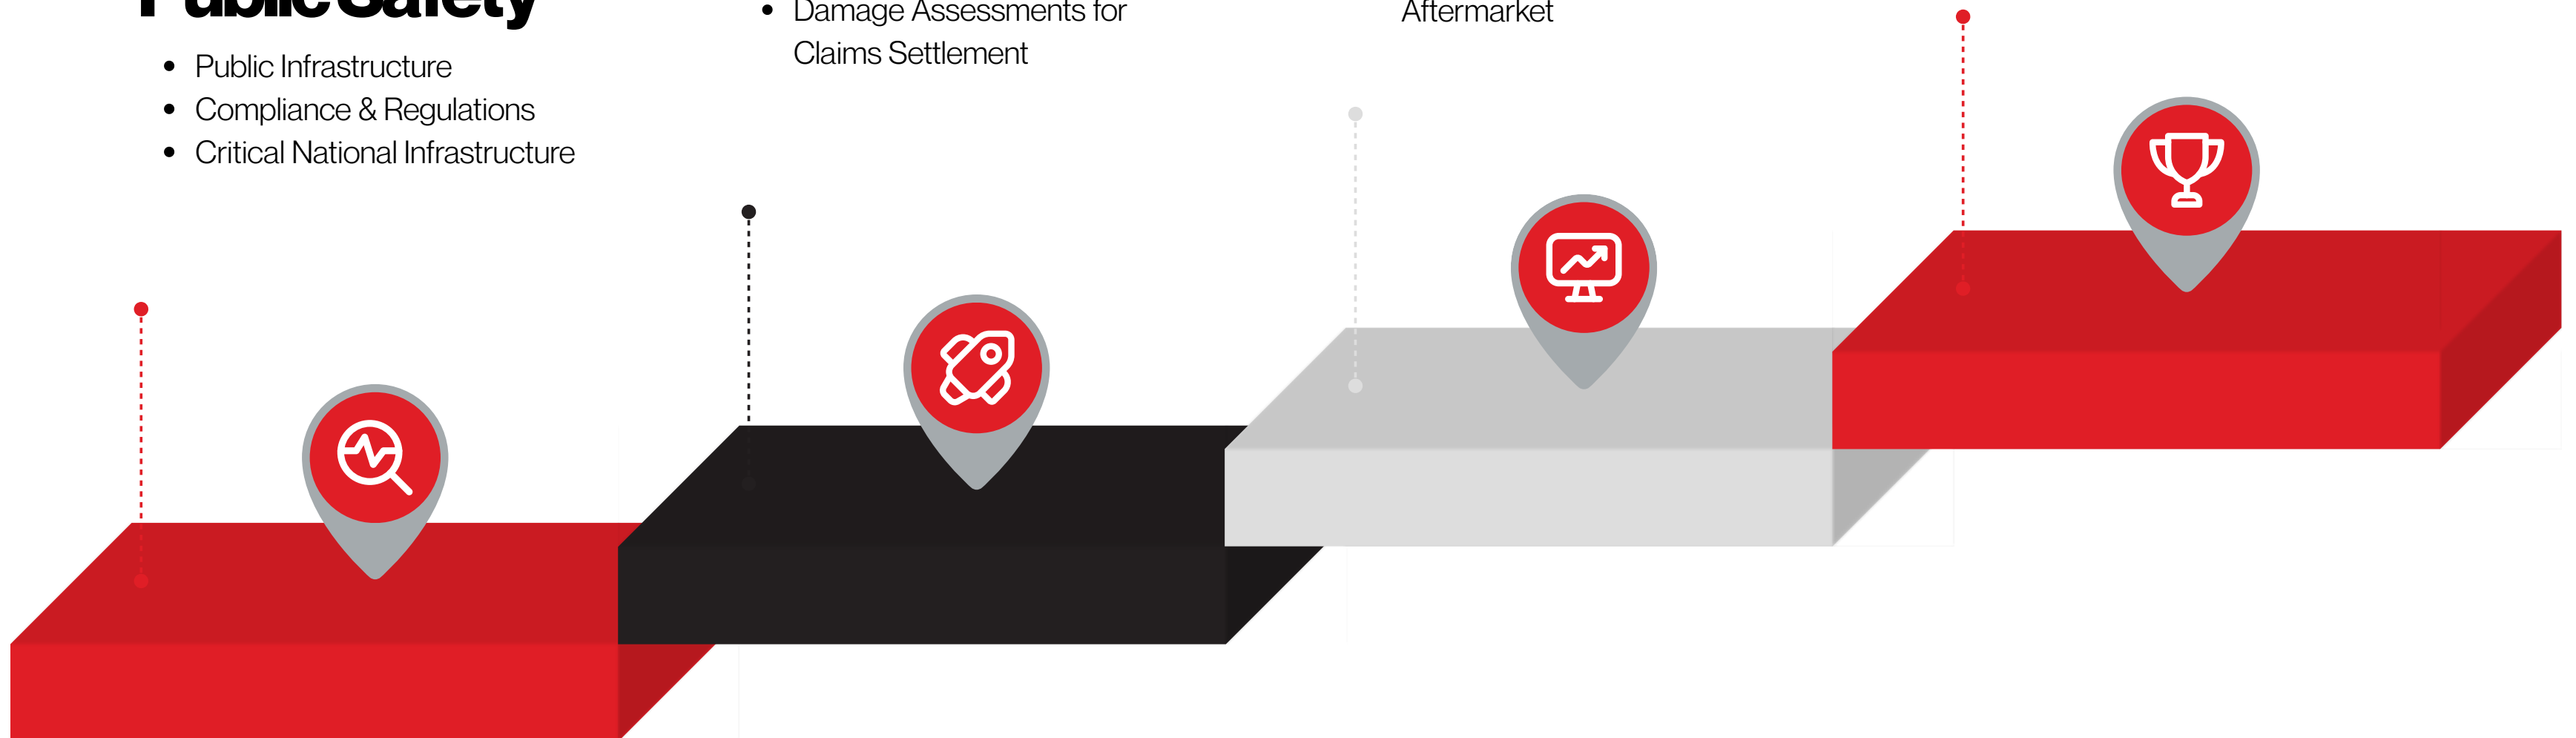

- Health Check for Underwriting
- Damage Assessments for Claims Settlement

## OEM

- Defect Assessment for Manufacturing
- Damage Assessment for the Aftermarket

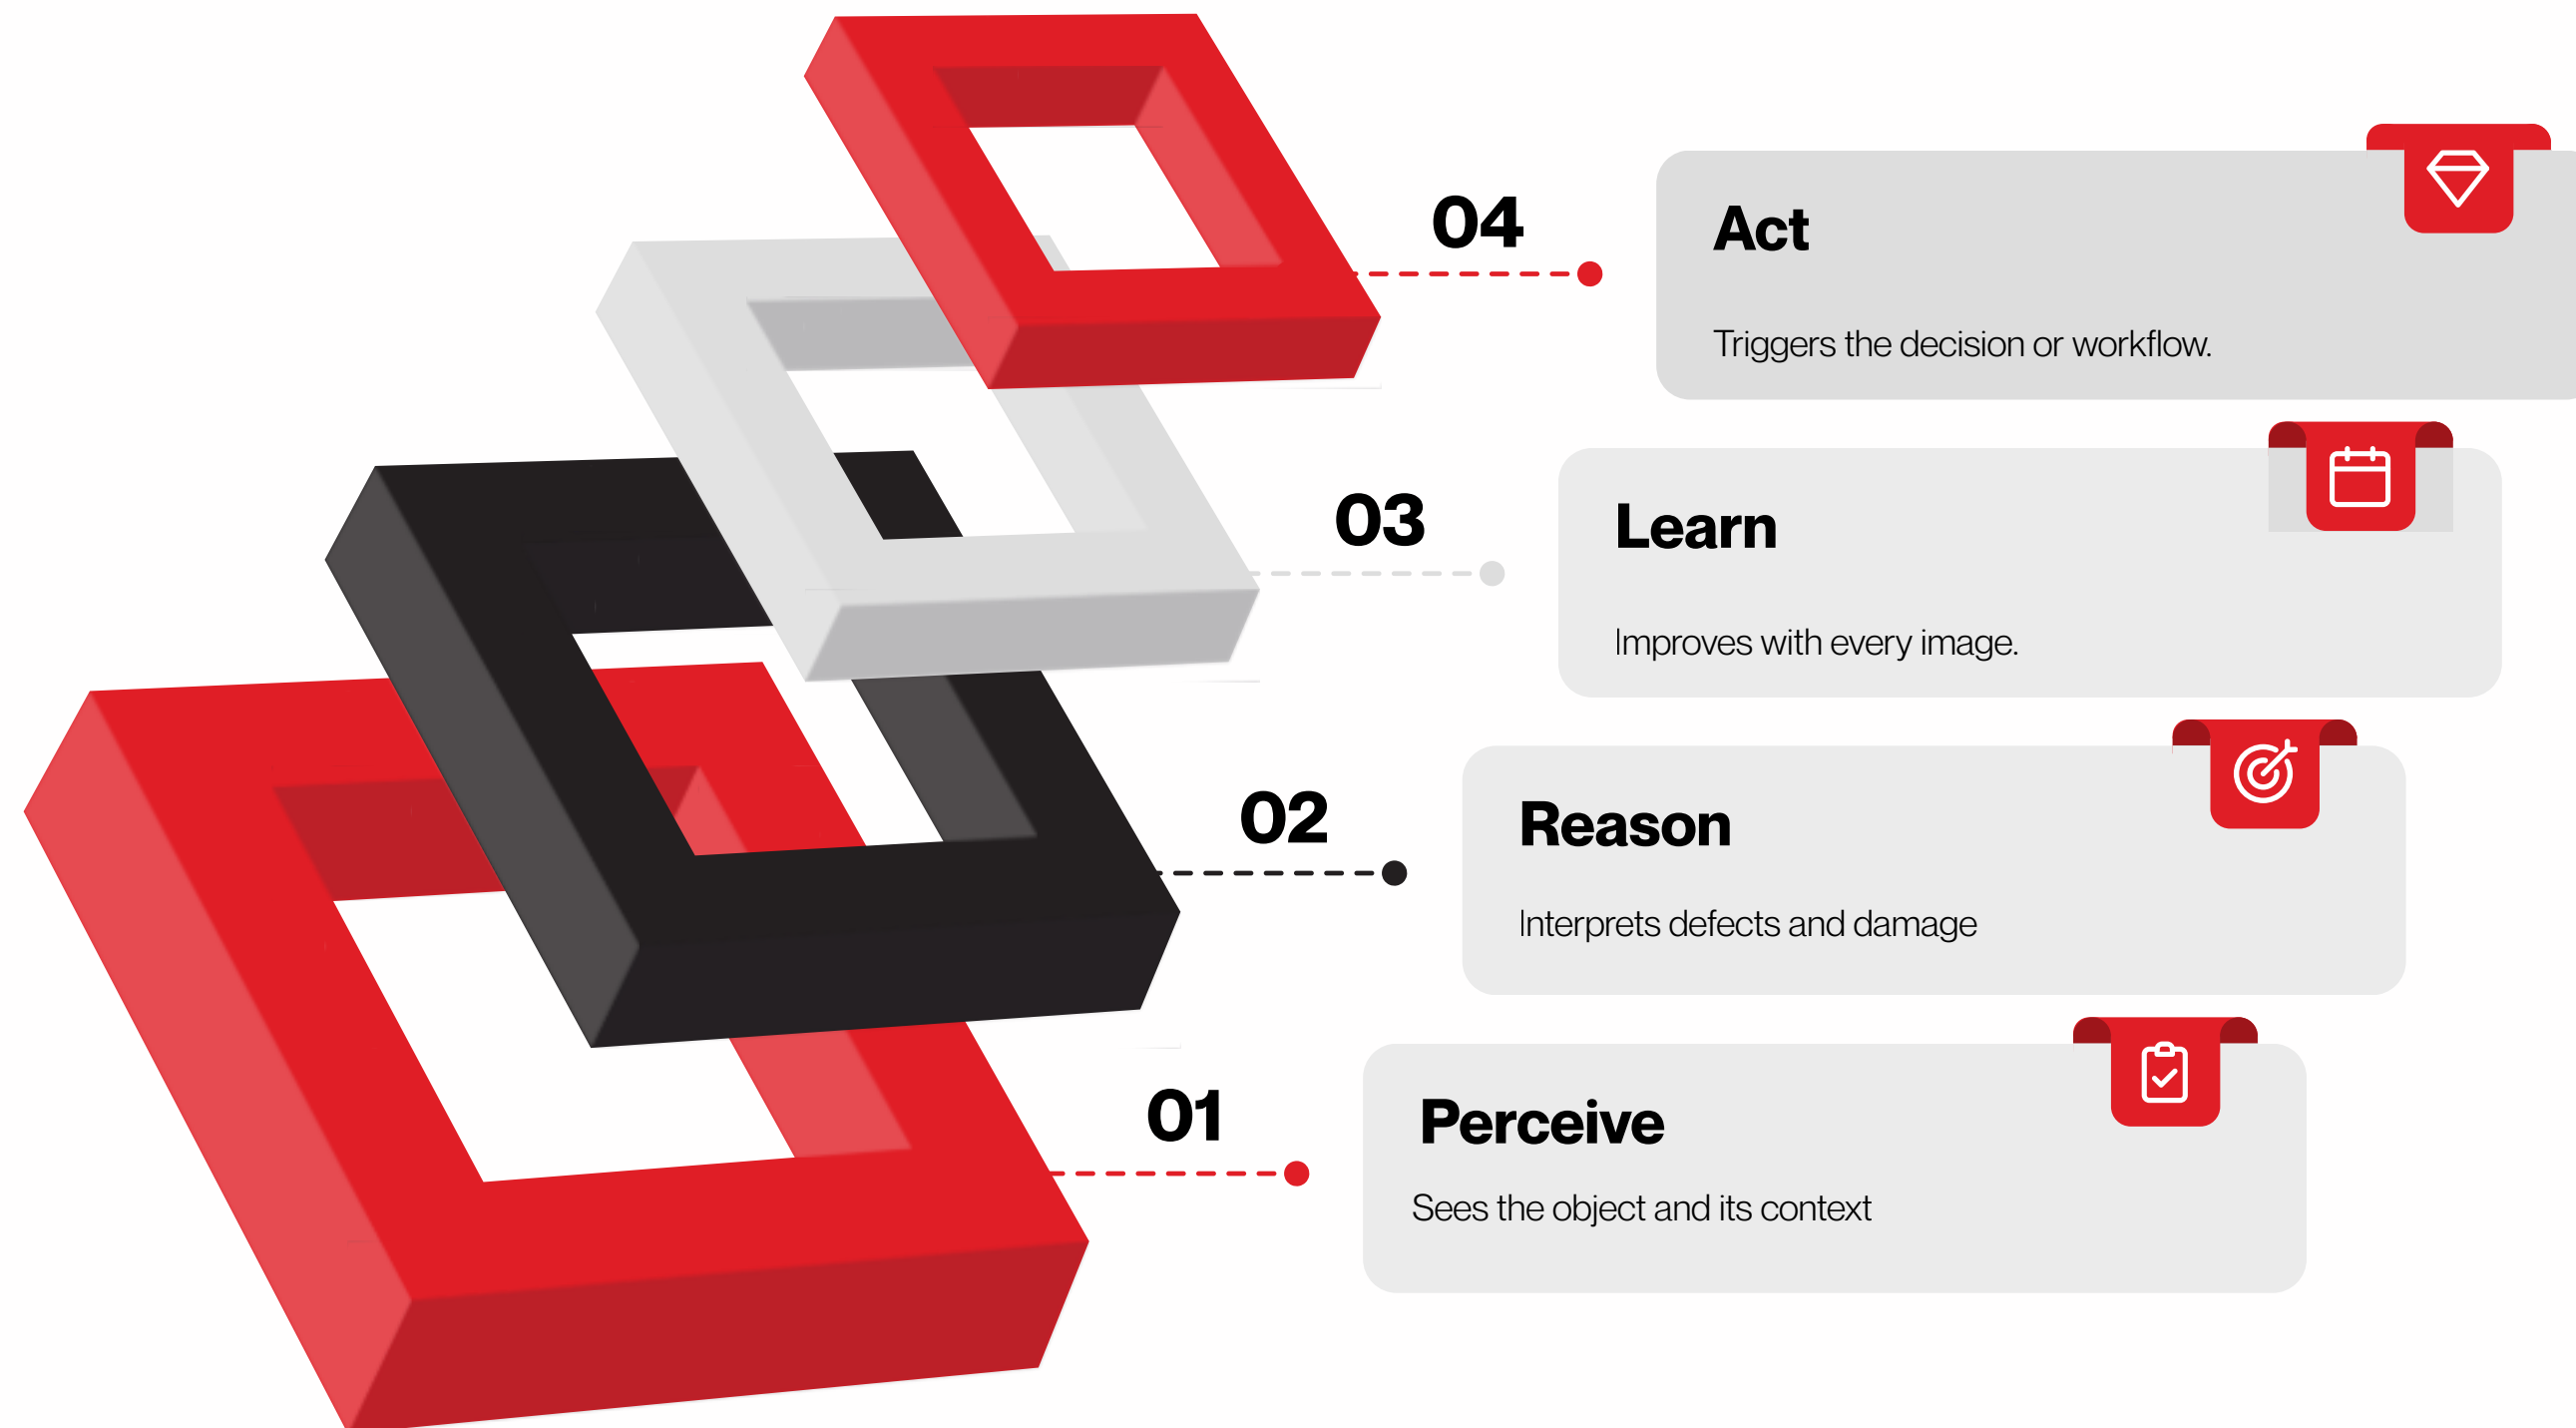

## Hospitality

- CamCom's inspection engine to hotels, airports, and managed facilities

# One intelligence loop, **every** inspection.

# Public Safety

120 million+ annual  
inspections that  
make cities safer.

## Reduced Fatality Rate

↓ 62%

fewer fatalities & casualties

## Incident resolution

↑ 30 M

Incidents processed.

## Incidents processed

↑ 20 M

revenue via enforcement.

## Money Saved

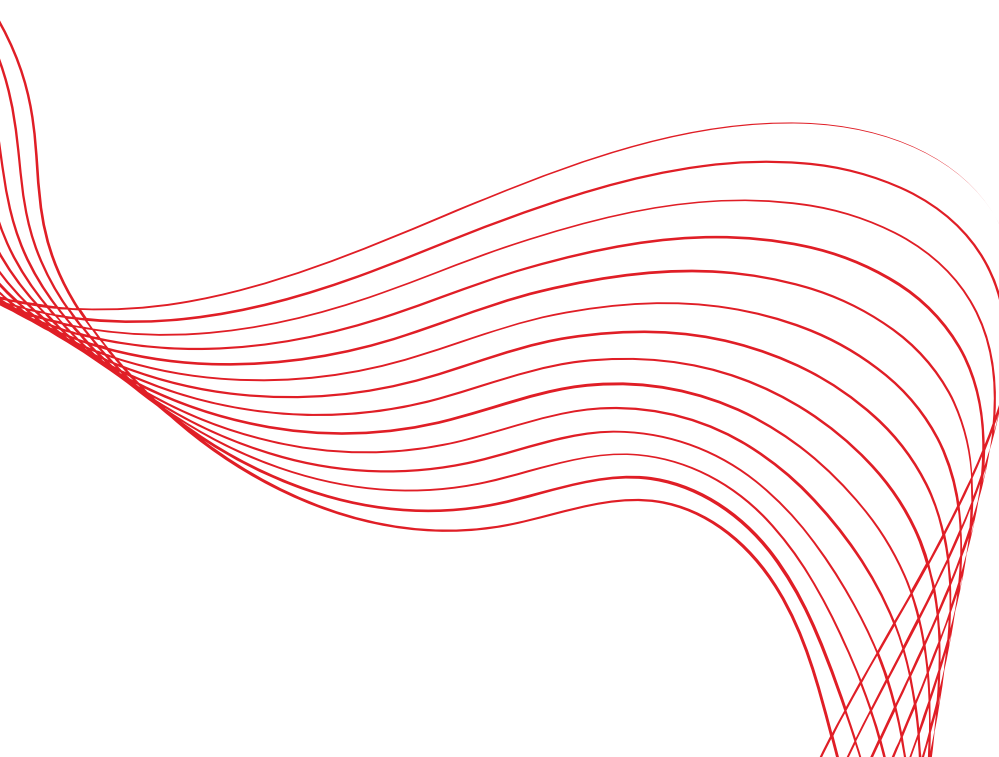

↑ \$38 M

operational cost reduction

# OEM

99.97% detection  
accuracy.  
At the speed of your  
line.

## Accuracy depth

50 microns

Detection threshold.

## Incident resolution

<20 sec

Per inspection.

## Deployed

96%+

Defect assesment accuracy.

## Incidents processed

500 M+

images processed yearly

# Insurance

Claims assessed in  
seconds, **not days.**

## Accuracy depth

96%

Accuracy

## Resolution Speed

90%

Faster process.

## Cost reduction

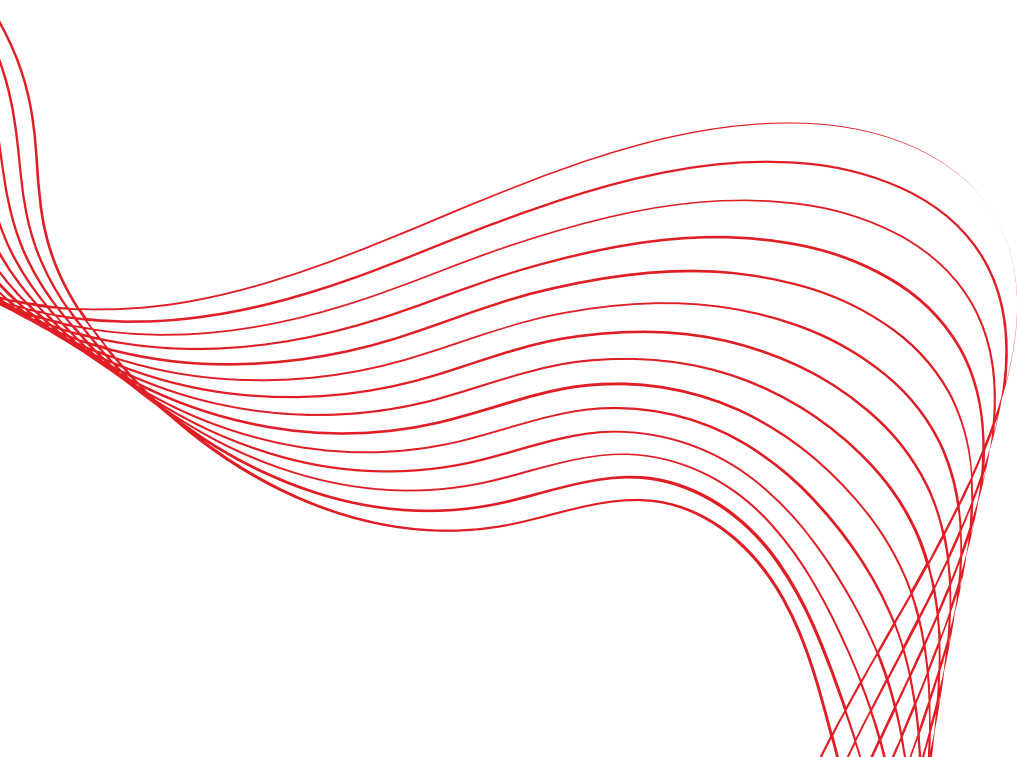

40%

direct cost reduction

## Loss ratio

10%

reduction.

# Underwriting

Claims assessed in  
seconds, **not days.**

## Policy Issuance

>70%

auto-decisioning

## Resolution Speed

90%

Faster process.

## Underwriting Rules

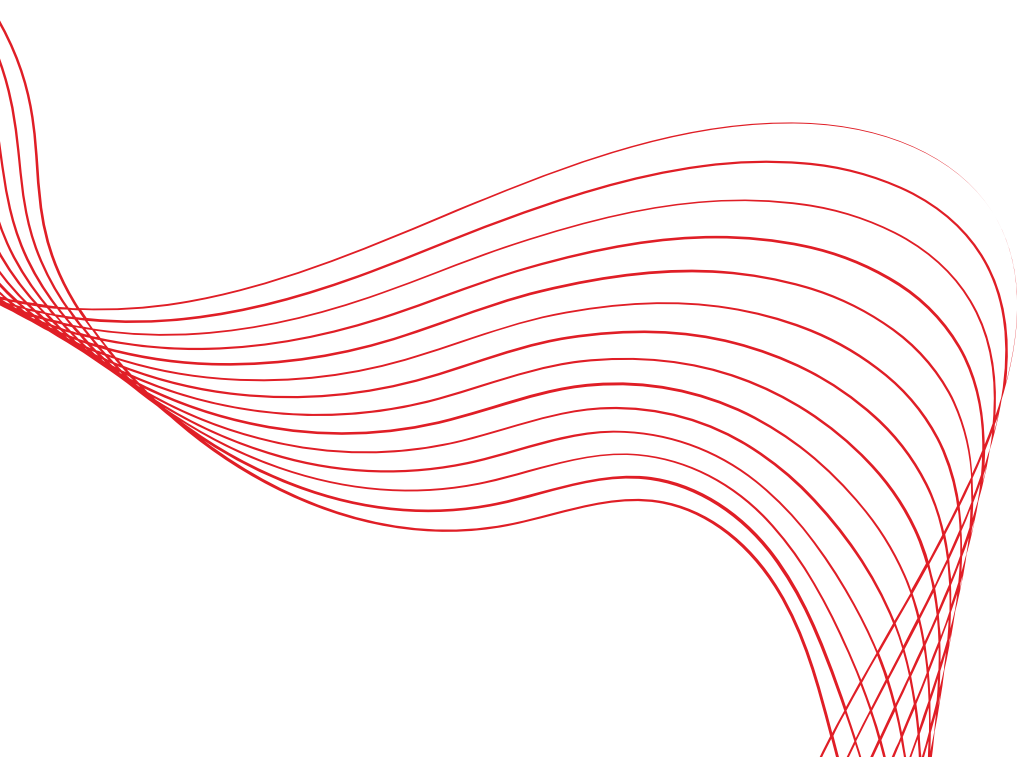

40+

different detection and fraud  
deterance parameteres

## Accuracy depth

96%

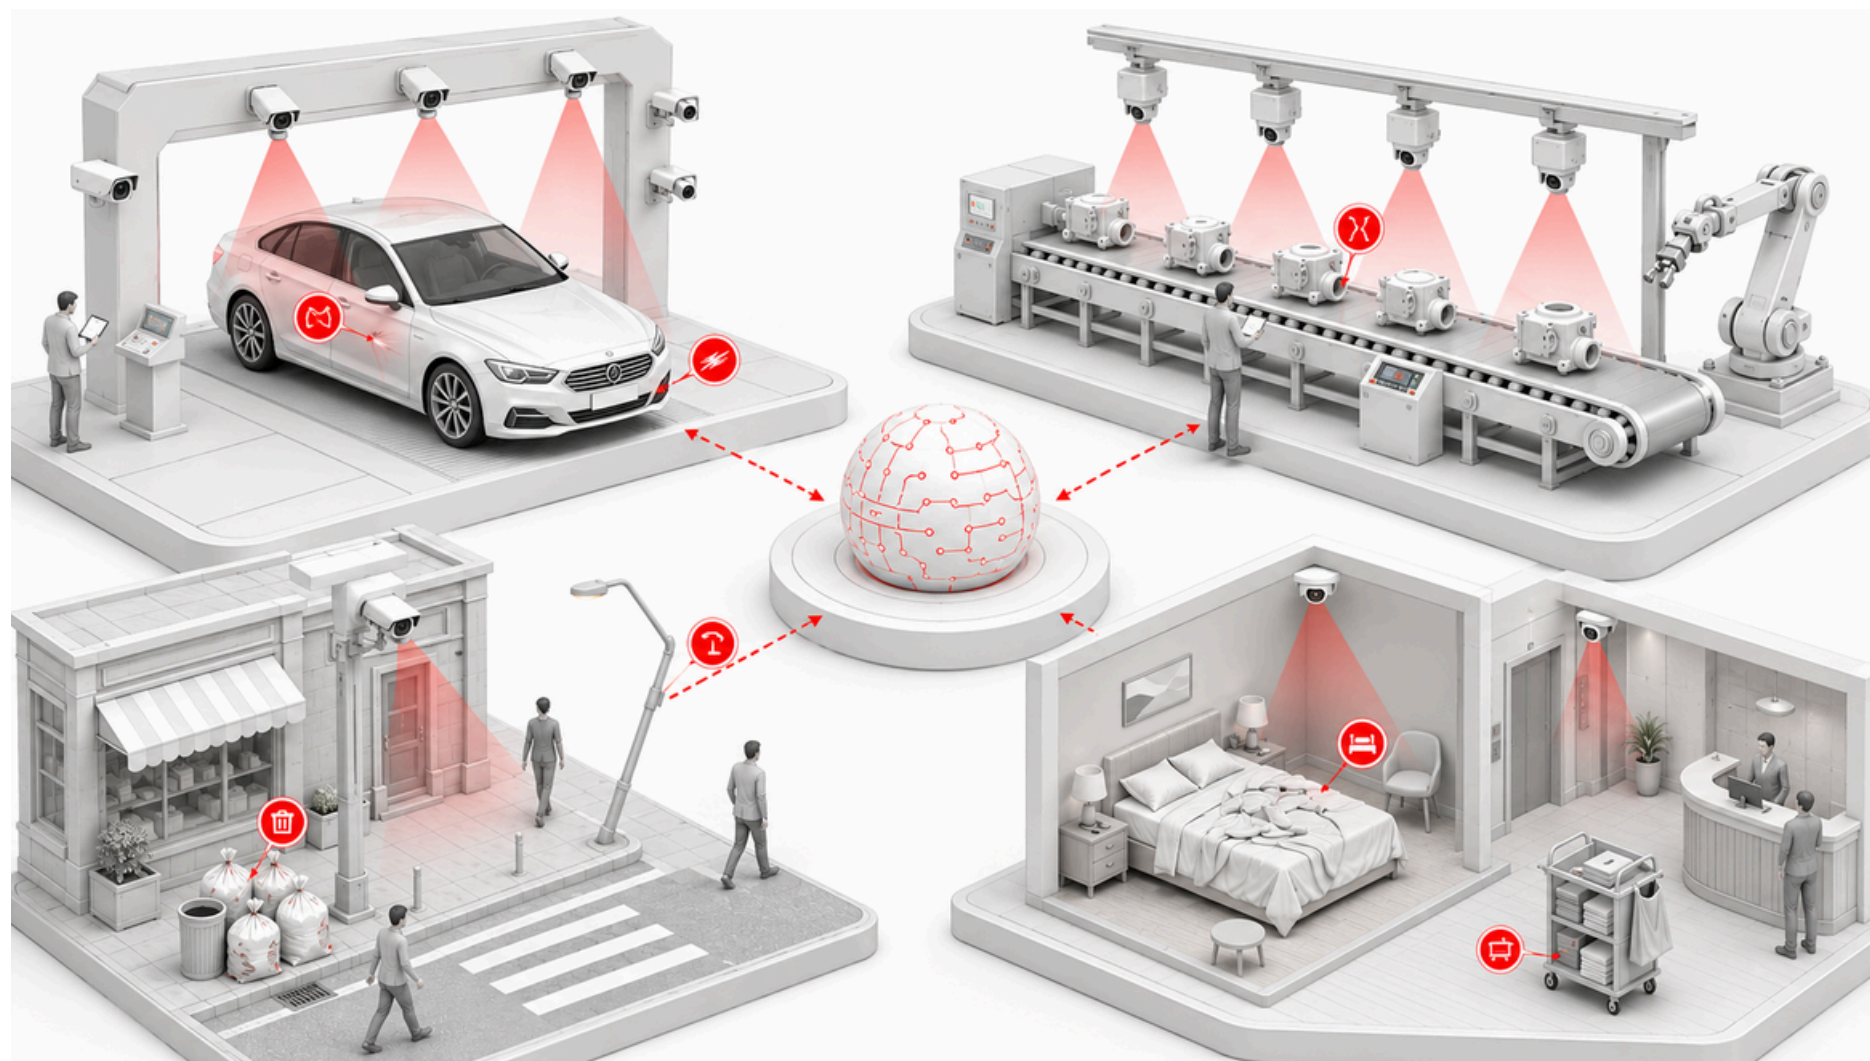

Accuracy

# Built to inspect anywhere — whatever the point of capture.

EYE THE FUTURE

1

## In hand - **TriNetra**

AI-guided self-inspection through any smartphone camera. Puts inspection-grade capture in the hands of field teams at the point of collection.

2

## Fixed on the line - **R.I.G**

Bespoke retrofit inspection gantry for real-time manufacturing-line inspection. Combines deflectometry with the AI World Model for sub-50-micron precision.

3

## Always on - **Mizhi**

Continuous visual observability engine for facilities, hospitality and public safety environments. Turns existing camera feeds into an always-on inspection layer.

# The people **who'd know.**

**ATUL GUJRATHI**

Joint President Claims  
(HDFC ERGO)

“From the business angle, CamCom has increased efficiencies and turnaround. The journey with CamCom has been a revelation, and we hope to extend this relationship for many more years. A special mention about the CamCom team, a set of highly qualified professionals whose dedication and commitment have been a huge reason for our success story.”

**ALI RAJHI**

Assistant Minister  
(MoMRAH - KSA)

“Our collaboration with CamCom in bringing Computer Vision as a bleeding-edge enabler has resulted in highly encouraging results. We are proud and excited to formalise our partnership with CamCom and work with their bright and committed team. We look forward to working with CamCom to eliminate visual pollution and extend the application of AI and CV to other high-priority topics.”

**SK VIJAY**

Divisional Head Digital  
Manufacturing-ESG & Data  
Analysis (TVS)

“From TVS Motor Company, I particularly appreciate your engineers' efforts in building the ‘tunnel-based painted parts inspection’ equipment. This shows their innovative mindset, commitment, hard work, and dedication. We enjoy working with you. I wish the CamCom team the very best in achieving many more significant milestones.”
